

The LENS, in promoting free, responsible, and sustainable research:

1. adopts the principles of ethics and integrity of scientific research.
2. supports every action aimed at protecting the freedom and dignity of the person;
3. undertakes to spread the values of legality, solidarity and rejection of any type of discrimination;
4. adopts inclusive language in its acts and communications;
5. endeavors to guarantee equal gender opportunities and stimulate knowledge and awareness of the obstacles to its full realization;
6. encourages collaboration with respect for the community of researchers and technical-administrative staff;
7. supports the training of young researchers and their progress towards independence;
8. is open to intercultural, international and interinstitutional exchange;
9. promotes every action aimed at guaranteeing quality and safety in the workplace;
10. is committed to the social, cultural, and economic impact of its research.

I adhere to the principles and mission of LENS
